## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 12-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,3 and 4 of U.S. Patent No. 6,658,100. Although the conflicting claims are not identical, they are not patentably distinct from each other

Art Unit: 2642

because both instant application and patent '100 claim the same method of obtaining information about a called party at a calling party device. Claim 12 of instant application corresponds to claim 1 of patent 100; claim 13 of instant application corresponds to claim 3 of patent '100 and claim 14 of instant application corresponds to claim 4 of patent '100. The common subject matter is the method comprises entering a telephone number for the called party at the calling party device; receiving at the calling party device an address for locating a customized file of the called party; retrieving the customized file at the calling party device using the address received; and communicating from the calling party device with the called party over a voice channel associated with the telephone number. Patent '100 differs from the claimed invention is that patent '100 fails to teach the method wherein the calling party device comprises a mobile phone having a data display. However, mobile phone with a data display is well known in the art. The mobile phone is used for displaying a World Wide Web page is also well known in the art. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the use of mobile phone in place of a normal telephone device as well known in the art in order expand the service to mobile subscribers.
